

Fund Portfolio.

CSS Invest Zero.

Investment strategy

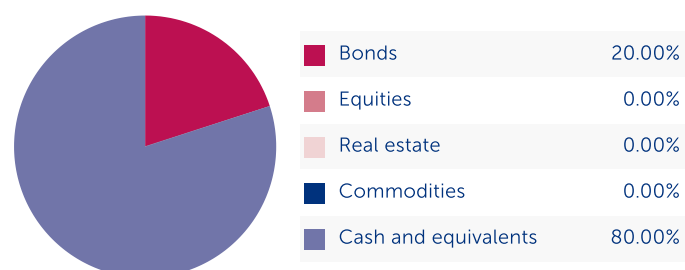

The portfolio invests exclusively in bonds and money market investments. The aim of this strategy is to preserve capital over the long term while minimising the risk. The funds invest in interesting markets worldwide. This ensures broad diversification – across different countries, currencies and economic areas. We focus on cost-effective

funds run by experienced asset managers, thus increasing the chances of making a good return. This client information sheet provides a general overview of the fund portfolio. The figures and charts do not show your personal return. All figures were calculated using historical data.

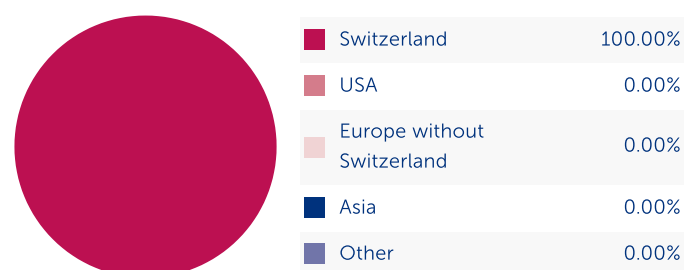

Performance

Portfolio breakdown by asset class

Portfolio breakdown by country

Risk indicator

Note: The underlying historical data used to calculate the synthetic risk indicator (SRI) cannot be used as a reliable indication of the fund portfolio's future risk profile. The risk category assigned to this fund portfolio may be subject to fluctuations and is not guaranteed. The lowest category does not mean that the investment is risk-free. (Scale of 1 = lower risk to 7 = higher risk)
