Highlights in 2015

The CSS Institute was honored by the visit of Professor Thomas McGuire (Harvard Medical School) for a two day workshop in March.

From left: C. Schmid, L. Kauer, K. Beck (CSS Institute), T. McGuire (Harvard, USA), P. Colatella (today CEO-elect of CSS)

In September, the institute organized the 2nd Swiss Health Economics Workshop. Just like the first edition, the workshop has been widely recognized and earned many positive feedbacks from the participants.

Impressions from the 2nd Swiss Health Economics Workshop

In addition, the institute hosted the 15th RAN meeting (Risk Adjustment Network) in Solothurn in October. This meeting has gained relevance for Switzerland given the ongoing reform

of risk equalization. We used the traditional “sponsor meeting” for an international lecture in risk equalization.

Participants of the 15th RAN-Meeting 2015

Prof. Dr. Wynand P.M.M. van de Ven, appointed honorary chair of the RAN.

We would like to thank all sponsors who made this event possible.¹

Rating success

We have been surprised by the highly recognized ranking presented by the Neue Zürcher Zeitung. According to this ranking the director of the institute has been rated as the most influential German speaking health economist in Switzerland and ranked 3rd among the economists from the University of Zurich.

Funding

The CSS Institute has been funded mainly by CSS Insurance AG. In order to counter the recently upcoming criticism of private funding of

¹ Ernst & Young, Visana, CSS, BDO, Helsana, and Polynomics.

scientific research we refer to our principle: “The scientific objectivity and independence of our research is measured in terms of the quality and nature of articles published in peer-reviewed journals.” As an act of transparency of our financing we also show the different sources of our revenues in 2015 in the following figure. A total of CHF 706'000 has been financed by CSS insurance AG (80%), by the Swiss National Science Foundation (12%), by teaching and consulting (5%), and by congress sponsors and congress fees (3%).

Konstantin Beck
 Director of CSS Institute for Empirical Health Economics

1 Research focus

One of our research focus was an analysis of „Fit, power, and balance“ in the context of risk equalization. This new framework reveals reinsurance as a so far underestimated tool to establish solidarity in a competitive health insurance market. The respective paper has been accepted meanwhile by Health Policy, see list below.

In addition, we continued the research on the interaction of solidarity versus responsibility factors and their influence on appropriate risk equalization. Results have been presented in a hearing of the national parliament’s commission which included them in the legal reform proposition.

Another topic was the sustainability of cost saving effects of managed care models. Substantial effects are found for a population part of a managed care plan for ten subsequent years. The resulting paper is under submission.

In another project, we questioned the risk communication for side effects caused by specific hormonal contraceptives (such as Yasmin® and Yaz®). A case with Yasmin® had provoked litigation up to the Swiss federal court. We also estimated the costs of side effects, which might even exceed the price for these pharmaceuticals. However, further research is needed to confirm our finding. If our hypothesis turns out to be true, we would have a situation where profits of private manufacturers are challenged by more expensive side effects financed by the public (through mandatory health insurance premiums) which would be a pareto-suboptimal outcome.

In collaboration with Polynomics (Olten), we continued our sub-project on willingness to pay for life prolongation. This project is part of the National Research Programme 67 „End of Life“ (www.nrp67.ch). We have been surprised to find quite a high willingness to pay for a QALY (CHF 200'000).

During a study trip Christian Schmid had the opportunity to have a closer and disillusioning look at the health care system of Singapore. Its often recommended cost reducing impact might be overestimated.

2 Team

Prof. Dr. Konstantin Beck (KB)

Lukas Kauer, PhD (LK)

Christian Schmid, PhD (CS)

Bettina Vogel, internship until February

Ivan Jivkov, internship June – November

3 Publications

3.1 Peer reviewed publications

Viktor von Wyl & Konstantin Beck (KB). Failure to pay for social health insurance premiums: Acts of protest or desperation? In: *Preventive Medicine Reports* 2 (2015), 127-133.

Viktor von Wyl & KB: Do insurer respond to risk adjustment? A long-term, nationwide analysis from Switzerland. In: *European Journal of Health Economics*, 17 (2), 171-83.

Viktor von Wyl, Harry Telser, Andreas Weber, Barbara Fischer, KB. Cost trajectories from the final life year reveal intensity of end-of-life care and can help to guide palliative care interventions, *BMJ Supportive & Palliative*

Care (Published Online First 15 October 2015).

3.2 Various publications

KB, Wissenschaft: Wie einheitlich ist eine Einheitsprämie wirklich? In: *CSS Versicherung* (Hg): *im dialog*, 2/15, 19.

Lukas Kauer (LK), Viktor von Wyl, KB, Transfers in der Grundversicherung. In: *CSS Versicherung* (Hg): *im dialog*, 2/15, 4-5.

KB: Pille Yasmin: Verschiedene Informationen für Ärzte und Patientinnen? SRF 4 News aktuell, September 1.

CSS INSTITUTE FOR EMPIRICAL HEALTH ECONOMICS

The CSS Institute was founded by the CSS Group in 2007. Its purpose is scientific research and teaching.

The institute is intended to deliver empirically verifiable answers to questions about how healthcare services can be financed efficiently and how their cost can be distributed fairly.

The institute is funded in part by CSS Insurance AG and – depending on the nature of the research project – in part by third parties, such as the Swiss National Science Foundation.

The scientific objectivity and independence of research is measured in terms of the quality and nature of articles published in peer-reviewed journals.

The opinions expressed by the CSS Institute do not necessarily reflect those of the CSS Group.
