Proof of insurance abroad.

Travel to EU or EFTA countries.

When travelling to EU or EFTA countries (Iceland, Liechtenstein and Norway), for your own security you require a European Health Insurance Card. **No additional proof of insurance is required.** If you have taken out basic insurance with us, you will find the European Health Insurance Card on the back of your CSS insurance card. The card contains all the details required to obtain medically necessary services in an EU or EFTA country. Should you require treatment, present the European Health Insurance Card to the doctor or hospital. Any retention fees must be paid directly at the time.

The retention fees are determined by the terms and conditions of the basic insurance of the country in question.

As the European Health Insurance Card only covers benefits that fall under the basic insurance of the EU/EFTA country in question, it is worth taking out travel insurance. This will also cover any additional costs that may arise, such as hospitalisation in a private ward, rescue operations or medical repatriation to Switzerland.

Travel outside Europe.

Outside Europe, at most, the basic insurance will cover double the costs that would have been reimbursed in Switzerland. In countries such as the USA, Australia, Canada, New Zealand or Japan, medical costs can be very expensive. Relatively high costs should also be expected in Africa or Latin America. In these countries, patients from Switzerland often prefer to be treated in private hospitals, where better care is offered. Public hospitals are not of the same standard as in Switzerland. We recommend that you take out travel insurance to ensure you too are fully covered in such cases.

Please note: In many countries, you also need a visa or confirmation of insurance. Further information on these countries is available at www.eda.admin.ch
